Seat Belts Save Lives!

In a very recent accident at a U.S. East Coast port, a container handling piece of equipment jackknifed and ejected the operator through the vehicle's windshield. His skull was fractured, several ribs and one of his legs were broken and his face was seriously cut by the windshield's glass.

He was not wearing his seat belt..... Had he been, he would have likely walked away unhurt. **Get home to your loved ones and friends alive. Wear Your Seat Belt!**
